SOIL PICK

QUALITY ENGINEERED. QUALITY BUILT. QUALITY SURVIVES.

WWW.MBW.COM
The Soil Pick is a selective excavator. Selective in the sense that it fractures, pulverizes and displaces porous and semi-porous soils, yet leaves non-porous objects unaffected. The Soil Pick excavates soil without risk of damaging buried utilities.

The Soil Pick employs converging/diverging nozzle technology to accelerate compressed air to supersonic speed (to 1475 mph). The high velocity air stream travels approximately 4 inches from the distal end of the Soil Pick—"the cutting edge"—before decompressing to atmospheric pressure with sufficient violence to pulverize and displace soil.

What separates the MBW Soil Pick from other excavation tools employing converging/diverging nozzle technology? Safety. Non-conductive, non-sparking tools are of obvious benefit to those working in environments that may be gas enriched and/or are in close proximity to live electric lines.

Also for reasons of safety, MBW standardizes the Soil Pick’s cutting edge at approximately 4 inches*. A 4 inch cutting edge is long enough to facilitate rapid excavation, yet short enough to minimize the potential for personal injury caused by misdirection of the cutting edge. Very importantly, soil aeration beyond the target utility is minimized, thus simplifying and facilitating effective backfilling and compaction of the excavation. The 4 inch cutting edge also provides better control of the air stream while working in the immediate area of a gas leak.

The Soil Pick’s non-sparking, brass nozzle weighs 4.2 ounces. It is important that the nozzle does not detach from the barrel to become a high velocity projectile. For this reason, the nozzle is threaded into the Soil Pick’s barrel and cemented in place. Some manufacturers promote easily exchanged nozzles. MBW’s view is that safety comes first.

The Soil Pick requires no periodic maintenance. A pressure gauge on the handle assembly advises the operator if the tool is working at acceptable pressure. The Soil Pick weighs 6.2 lbs., has zero hand/arm vibration and can be used for extended periods without fatigue.

* NOTE: Nozzle capacity (cfm, air stream velocity and cutting edge) is dependent on interior nozzle profile. Contact MBW for nozzle options.

**Dependent on soil type ( ) Metric Measurements. Specifications subject to change without notice.**
**HANDLE VIBRATION TEST**

*Product type – MBW Soil Pick SP125*

*Manufacturer of testing apparatus – Castle*

Accelerometer was affixed to the rear of the handle on the Soil Pick and all three axes were tested.

*Accelerometer position:
- X axis = 0.0M/S^2
- Y axis = 0.0M/S^2
- Z axis = 0.0M/S^2

*Hand/arm vibration = 0.0M/S^2*

**TREE CARE**

MBW’s Soil Pick provides a multi-functional air tool for a variety of applications in the tree care industry including:

*Radial Trenching*
Radial trenching is a process which involves aerating the soils around a tree root in a pattern resembling a wagon wheel. The Soil Pick provides a safe and damage free means of utilizing a high air pressure to loosen tightly compacted soils.

*Aeration & Excavation*

*Root Locating for Utility Line Installation or Pruning*

*Investigating Root Structure and Damage*

*Transplanting or Bare Rooting*

*Reducing Soil Compaction*

---

**NON-CONDUCTING BARREL**
- independently certified safe for 100,000 Volts/12” Barrel

**LARGE DEFLECTOR**
- protects operator from scatter of dirt and debris

**NON-SPARKING NOZZLE**
- allows safe use around leaking gas lines

**PRESSURE GAUGES**
- ensure maximum performance

**VARIABLE POLYMER TRIGGER**
- reduces operator fatigue

**ERGONOMIC HANDLE**
- Unlike the competition, the Soil Pick handle maintains a cool temperature and allows for extended operator use

SOIL PICK ACCESSORIES

42” EXTENSION (03848)
up to three 42” extensions can be added to the Soil Pick for hard to reach areas.

21” EXTENSION (03849)

45 DEGREE NOZZLE
Available in 80, 125, and 160 CFM, the 45 degree nozzle was designed to reach underneath buried pipes.
- 45 degree nozzle 80 CFM (17748)
- 45 degree nozzle 125 CFM (17749)
- 45 degree nozzle 160 CFM (17750)
  * requires an extension barrel

REPLACEMENT BARREL WITH NOZZLE
12”, 125 CFM BARREL (14593)
42”, 80 CFM BARREL (03820)
42”, 125 CFM BARREL (03813)
42”, 160 CFM BARREL (17594)

WATER NOZZLE (21372)
Includes sprayer nozzle, 10 foot hose and extender

SOIL PICK CASE (19358)
A rugged case designed to protect your Soil Pick and accessories.
