PRODUCT CHANGE NOTIFICATION

Date: December 12, 2019
To: Authorized MBW Dealers and Distributors
Subject: Vibratory Rammers Product Update

MBW's Vibratory Rammers are ideally suited for the compaction of granular, mixed and cohesive soils in confined areas. Our innovative designs aggressively address high maintenance issues associated with this type of product which distinguishes MBW's rammers from the competition. Recently MBW has refreshed the fuel containment area of the product through the addition of a new fuel tank and protective shroud. This update results in the same superior fuel filtration and run time as the past system.
